Master secondary math and engineering with zero-parenthesis stack fluency.

High school and AP mathematics demand structural fluency: evaluating discriminants, resolving 2D force vectors, linearizing exponential decay, computing binomial probabilities, and masking 8-bit registers. Paired with the scientific StackCalc SC-32, every multi-step expression executes from the inside out across four visible stack registers (T, Z, Y, X) without parentheses or hidden scratchpad errors.

Built specifically for Grades 9–12, Pre-Calculus, AP STEM, and college-prep learners, High School & STEM Lab opens with a 4-Page SC-32 Scientific RPN Bootcamp and delivers 10 deep units covering quadratics, trigonometry, vectors, polar coordinates, exponential growth, logarithms, sequences & series, statistics & combinatorics, and binary/hex/bitwise logic: each with Core & Extension Labs, 4-Problem Investigations, 6 leveled worksheets (Practice A–F), a 100-Point Unit Mastery Check, a STEM Lab Case Study, 4 Cumulative Mastery Exams, and Prime Factor Studio & SC-32 Reference Guides.

Inside the High School & STEM Lab: 4-Page SC-32 RPN Bootcamp • 10 Eleven-Page Units (110 Lab, Practice A–F, Quiz & STEM Pages) • 840 Active Problems • 4 Cumulative Mastery Exams & Prime Factor Studio (PRIME-01) • 128 Pages.
