Tactile Concrete-Pictorial-Abstract (CPA) Station Guide • CCSS.MATH.2.OA.C.4

Student Name: _____ Date: _____ **Model: SC-6** **Check Score: ___ / 4**

**STUDENT SELF-CHECK RULE (NO CHEATING):**
Build with blocks and solve on paper first! Use your SC-6 calculator ONLY to verify answers on the 4-line LCD screen.

## TEACHER DIAGNOSTIC GUIDE: COMMON MISCONCEPTIONS & REMEDIATION

**Key Misconception to Target During Station Observation:**

Distinguish 2 rows of 5 from 5 rows of 2.

**How the Manipulatives & Calculator Foster Self-Correction:**

Students solve with pencil and physical blocks first. When they self-check on the SC-6, any discrepancy between their written answer and the calculator's 4-line LCD immediately prompts them to re-inspect their physical bench model or regrouping, turning errors into productive struggle without teacher intervention.

**Station Facilitation & Pacing Tip:**

Keep 3D printed trays docked on standard Gridfinity baseplates to prevent loose parts on student desks. Encourage students to articulate their CPA steps: name the block representation (Concrete), point to their drawn tape/bond model (Pictorial), and verify register values (Abstract).

## CLASSROOM SCORING & STATION MASTERY RUBRIC

| | |
|---|---|
| **Exemplary (18–20 pts):** | Complete, accurate manipulative sketches; exact math answers; independently verified self-check on LCD stack. |
| **Proficient (14–17 pts):** | Correct math answers; minor sketch omissions; verified on calculator with minimal teacher prompting. |
| **Developing (10–13 pts):** | Understands problem concept but made computational slips; successfully self-corrected using calculator LCD. |
| **Intervention (<10 pts):** | Relied on calculator before solving on paper, or struggled with underlying physical manipulative models. |
