BIG IDEAS MATH COMPANION • 10 UNITS / 900 PROBLEMS

MIDDLE SCHOOL MATH LAB

Student Practice Workbook for Big Ideas Math (Grades 6–8)

StackCalc

MATHEMATICS / MIDDLE SCHOOL WORKBOOK

Why solve a problem only one way when three perspectives make it unforgettable?

Middle school is the bridge between elementary arithmetic and high school algebra. When students solve every section three ways—by hand on paper, with physical math blocks, and step-by-step on the StackCalc SC-6 four-register stack—ratios, fractions, integers, equations, geometry, and statistics lock into place.

Aligned section-by-section to the Big Ideas Math Middle School sequence (Grades 6–8), this workbook delivers 45 core sections, 90 tiered Practice A & Practice B worksheets, 900 multi-method problems, chapter stories from From Blocks to the Stack, and a complete back-of-book student answer key.

Inside the Workbook: 10 Middle School Units • 45 Concept Openers & Worked Examples • 90 Practice A & B Worksheets (900 problems) • Complete self-check answer key.
