TEN-FRAMES & PLACE VALUE ARITHMETIC LAB

Two-Color Flip Counters, Solid '10' Rods & Dual 10-Frame Lid

WHAT IS THIS BOX FOR? PUT AWAY YOUR FINGERS & SEE NUMBERS AT A GLANCE.

Your brain can instantly recognize up to 5 objects without counting. This 2×5 Ten-Frame turns addition and "carrying the 1" into visual patterns!

5-ANCHOR SUBITIZING & TWO-COLOR COUNTERS

Recognizing a small quantity without counting one-by-one is called "subitizing." Our Ten-Frame organizes numbers into two rows of 5:

- **Two-Color Counters: Flip between Red (Side A) and Green (Side B)**
- **Tactile Finger Rings: Grooved surfaces you can feel without looking**
- **Stackable Plugs: 10 counters snap together into a solid 10-tower**

Once you see 8 as "a full row of 5 plus 3 more," finger-counting disappears!

10 ONES = 1 SOLID TEN-ROD (70 MM)

Stack 10 unit counters into a tower: it stands 70.0 mm tall — the exact same height as one solid purple '10' rod! That's place value in your hand.

WHAT'S INSIDE YOUR BOX (54 PIECES)

- 40 Two-Sided Reversible Counters (Red on Side A / Green on Side B)
- 6× Solid '10' Regrouping Rods + 6× Operator Blocks (+, −, =, 10) + Box & Lid
- Keep this folded guide inside your box lid for examples & part IDs!

★ YOUR FIRST 60 SECONDS WITH THIS BOX — START HERE!

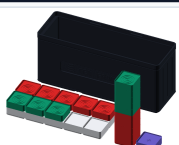

1. **FLIP THE TWO-COLOR COUNTERS:**
   Notice every counter is Red on one side and Green on the other—flip to show two addends!
2. **FILL ONE ROW OF 5 ON THE LID:**
   Drop 5 Red counters along the top row and 3 Green below: your eyes see 5 + 3 = 8 instantly!
3. **PRESS THE BOX ICON KEY [▦]:**
   Type 8 [ENTER] 2 [+] 5 [+] [▦] on your calculator—the 2×5 grid icon on your box is the [▦] key!

BOX ICON = CALCULATOR [▦] TEN-FRAME & [PV] PLACE VALUE KEYS

The button icon embossed on your box lid (left) is the exact calculator key ([▦] Ten-Frame & [PV])! Build every lesson with your blocks, then press the key.

5-ANCHOR SUBITIZING (5+3=8) ↔ BOX [▦] & [PV] ICONS

STEP A: HANDS-ON WITH 5-ANCHOR SUBITIZING — 1:1 CAD SCENE

Top Row = 5	5 Red + 3 Green	2 Empty Sockets
Instant Benchmark	See 8 at a Glance	10 − 8 = 2

▲ **Because each 10-frame is arranged in two rows of 5, your eyes** recognize 5 + 3 = 8 and 2 empty spots instantly!

STEP B: TRY IT ON YOUR CALCULATOR — BOX ICON: [▦] Ten-Frame & [P

5-ANCHOR TREE: 8 = 5 + 3 (2 SHY OF 10)

10-FRAME CAPACITY = 10

Filled: 5+3 = 8 | 10 − 8 = 2 [PV]

Top Row: 5 Red | Bot Row: 3 Green | Empty = 2

5 [ENTER] 3 [+] 10 [xey] [−] [PV] = 2

PRESS BOX ICON & RPN KEYS (SCG):

1. 5-ANCHOR:
   5 [ENTER] 3 [+] [=] 8
2. 10-COMP:
   10 [xey] [−] PV [=] 2

✓ DISPLAY (X) = 2

KEYSTROKES: 5 [ENTER] 3 [+] 10 [xey] [−] [PV]

Build 5 + 3 = 8 on the lid tray, then subtract from 10 and press [PV] to verify the 2 empty sockets!

HOW IT WORKS: THE CORE IDEA

5-Anchor Subitizing & Trading 10 Ones for 1 Ten-Rod

WHY WE GROUP IN TENS (PLACE VALUE)

Our entire number system is built on powers of 10:

10 × 10^k = 10^(k+1)

Whenever ten ones fill up a Ten-Frame, they trade up into a single unit of the next higher place value:

- **10 Unit Counters (10 × 1) = 1 Solid Ten-Rod (1 × 10)**
- **10 Ten-Rods (10 × 10) = 1 Hundred-Flat (1 × 100)**

Because the Ten-Frame physically holds at most 10 counters, "carrying" and "borrowing" stop being mysterious rules — you see the tray fill up!

HARMONIZED 7.00 MM STACKING HEIGHT

Each counter adds 7.00 mm of height (1U), matching our 1/12th Fraction block and Prime block [2]. A stack of 10 counters is 70.0 mm tall — matching the solid '10' rod right down to the millimeter.

TACTILE GROOVES & EASY LIFT NOTCHES

Every counter has concentric finger rings you can feel with your eyes closed, and every tray socket has side thumb-notches so small fingers can pop counters out effortlessly.

3 CLASSIC MATH TRAPS THIS KIT MAKES IMPOSSIBLE

VISUAL PROOF

✗ **TRAP 1 — Counting on fingers one-by-one:**
✓ **FIX:** The 2×5 grid trains your brain to see 8 as '5 and 3' or '2 shy of 10' in a split second.

✗ **TRAP 2 — Blindly 'carrying the 1' without meaning:**
✓ **FIX:** Trading 10 stacked counters (70mm) for 1 Purple '10' rod (70mm) proves what that '1' actually is!

✗ **TRAP 3 — Forgetting 10-complements (7 + ? = 10):**
✓ **FIX:** Any partially filled 10-frame shows the complement as the empty sockets staring right back at you.

CALCULATOR CHECK: 5 [ENTER] 3 [+] 10 [xwy] [−] [PV] → X = 2

COMPONENT & DIMENSION GUIDE

COMPONENT	DIMENSIONS	VALUE	COLOR
Dual Counter	Ø18.0 × 7.00 mm	1 Unit	Red / Green
10-Stack Tower	Ø18.0 × 70.0 mm	10 Units	Red / Green
Solid '10' Rod	19.6 × 70.0 mm	1 Ten	Purple
Operator Block	19.6 × 19.6 mm	+ − =	Gold
Ten-Frame Lid	126 × 42 × 10 mm	2x5 Tray	Matte Black
3x1 Storage Bin	126 × 42 × 49 mm	4 Towers	Matte Black

WHY YOUR BRAIN LOVES THIS

- Instant Visual Benchmarks: A full row is always 5; a full tray is always 10.
- Easy Finger-Lift Notches: Counters pop in and out without frustration.
- Stackable Into Towers: Snap 10 counters together to build a 10-rod.
- Fast Cleanup: 4 wells hold 10 counters each — if all 4 are level, none are lost!

1:1 CAD REFERENCE VIEW

BOX ICON & FORMULA QUICK-REFERENCE

Box Button Icon Keys:
[▣] Ten-Frame & [PV] Place Value

5-Anchor Subitizing:
8 = 5 + 3 | 7 = 5 + 2 | 9 = 5 + 4

10-Complement Law:
n + (10 − n) = 10 (Filled + Empty = 10)

Make-a-Ten Addition:
8 + 7 = (8 + 2) + 5 = 10 + 5 = 15

Tens & Ones Keystroke:
N [ENTER] 10 [g][÷R] → X Tens, Y Ones

EXAMPLE 1: HANDS-ON WALKTHROUGH

Instant Recognition: See 5 Red + 3 Green = 8 Without Counting

1 SUBITIZING 8 & BRIDGING TEN (8 + 7 = 15)

1. MODEL 5-ANCHOR SUBITIZING (NUMBER 8):
• Place 5 Red counters in the top row and 3 Red in the bottom row.
→ **Eyes see 5 + 3 = 8 and 2 empty sockets (8 + 2 = 10)!**

2. BRIDGE ACROSS 10 TO ADD 8 + 7:
• Start with 8 Red counters in the frame and 7 Green counters outside.
• Slide 2 Green counters into the 2 empty sockets to complete 10!

3. READ THE MAKE-A-TEN SUM AT A GLANCE:
1 full Ten-Frame (10) + 5 Green counters remaining outside:
→ 8 + 7 = (8 + 2) + 5 = 10 + 5 = 15!

BENCHMARK 5 AND 10 MENTAL ANCHORS

Cognitive research proves that students who master 5 and 10 benchmarks calculate 3x faster than those relying on counting by ones. The physical ten-frame hard-wires these geometric benchmarks into working memory.

STEP B: TRY EXAMPLE #1 ON YOUR CALCULATOR [▦] Ten-Frame & [P

STEP 1 (FILL TO 10):
Slide 2 Green counters into the left 10-frame on the lid and press 8 [ENTER] 2 [+] (= 10).

STEP 2 (ADD REMAINING 5):
Press 5 [+] → X = 15 (matching 1 full 10-frame + 5 Green counters in the right frame).

STEP 3 (PRESS BOX ICON [▦]):
Press [▦] on your SC-6 calculator to display 15 as a live visual Ten-Frame on screen!

LIVE 4-REGISTER RPN STACK READOUT (AFTER KEYSTROKES):
T: 0 | Z: 0 | Y: 0 | X: 15 → DISPLAY (X) = 15

LESSON 1: MAKE-A-TEN (8+7 = 10+5) ↔ [▦] TEN-FRAME KEY

STEP A: HANDS-ON WITH COUNTERS ON LID 1:1 CAD SCENE

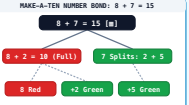

Left 10-Frame	Right 10-Frame	Total Sum
8 Red + 2 Green = 10	5 Green Remaining	10 + 5 = 15

▲ **Slide 2 Green counters across to finish filling the left** 10-frame: 8 + 7 transforms into 10 + 5 = 15!

STEP B: TRY IT ON YOUR CALCULATOR BOX ICON: [▦] Ten-Frame & [P

MAKE-A-TEN NUMBER BOND: 8 + 7 = 15

8 [ENTER] 2 [+] 5 [+] [▦] → 15

PRESS BOX ICON & RPN KEYS (SC6):

1. MAKE 10:
8 ENTER 2 + = 10

2. BOX ICON KEY:
5 + ▦ = 15

✓ DISPLAY (X) = 15

KEYSTROKES: 8 [ENTER] 2 [+] 5 [+] [▦]
Slide 2 counters on the lid to make 10, then press the Box Icon key [▦] on your SC-6 calculator!
✓ **4-REGISTER STACK: T: 0 | Z: 0 | Y: 0 | X: 15 → X = 15**

EXAMPLE 2: CORE MATHEMATICAL PRINCIPLE

Make-a-Ten Bridge: Why 8 + 7 Regroups Into 10 + 5 = 15

2 MAKING TEN REGROUPING: 8 + 7 = 15

THE PROBLEM: Add 8 + 7 without counting on fingers.

1. FILL FRAME 1 WITH 8 RED COUNTERS:
Top row has 5; bottom row has 3. Exactly 2 spaces are empty.

2. DECOMPOSE NUMBER 7 INTO 2 + 5:
• Take 2 green counters from the 7 and move them to Frame 1.
→ **Frame 1 is now FULL (8 + 2 = 10)!**

3. REGROUP INTO PLACE VALUE BLOCKS:
• Swap the full Frame 1 for one solid '10' miniblock rod.
• The remaining 5 green counters sit in Frame 2.
→ **Total: 1 Ten + 5 Ones = 15!**

✓ THE "MAKING TEN" BRIDGE THEOREM

8 + 7 = (8 + 2) + 5 = 10 + 5 = 15

Carrying in columns is simply filling a physical frame.

Students develop permanent mental addition agility by seeing the physical conservation of counters across two frames.

★ 2-PLAYER GAME: 'FLASH TEN-FRAME SNAP!' (2 MINS)

Player A secretly arranges counters on the lid's ten-frame behind a book, lifts the book for just 1 second, and covers it again. Player B must call out both the number of counters AND **how many empty spots are needed to make 10, then check with [▦]!**

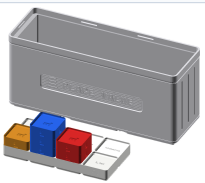

⚙ WHERE THIS SHOWS UP IN COMPUTER MEMORY & DIGITAL LOGIC

Grouping individual units into fixed-size frames (10 in decimal, 8 bits = 1 byte in binary) is the foundation of positional number systems! When a frame fills up, it overflows ('carries') **one solid bundle into the next register column.**

LESSON 2: BUNDLING 10 ONES INTO 1 TEN-ROD ↔ [g][÷R] KEY

STEP A: HANDS-ON WITH TEN-RODS & ONES

1:1 CAD SCENE

10 Unit Counters	1 Purple '10' Rod	Place Value Trade
10 × 7mm = 70.0 mm	70.0 mm Solid Tower	15 ÷ 10 = 1 R 5

▲ **Ten stacked unit counters (10 × 7.0 mm) stand at the exact same** 70.0 mm height as one solid Purple '10' rod!

STEP B: TRY IT ON YOUR CALCULATOR

BOX ICON: [▦] Ten-Frame & [P

PLACE VALUE REGROUPING: 15 = 1 TEN + 5 ONES

15 [ENTER] 10 [g][÷R] → X=1, Y=5

PRESS BOX ICON & RPN KEYS (SC6):

1. DIV BY 10:
15 ENTER 10 g ÷R

2. TENS/ONES:
X=1 Ten Y=5 Ones

✓ DISPLAY (X) = 1

KEYSTROKES: 15 [ENTER] 10 [g] [÷R]
Dividing 15 by 10 with [g][÷R] puts Quotient = 1 Ten-Rod in X and Remainder = 5 Ones in Y!

✓ **4-REGISTER STACK: T: 0 | Z: 0 | Y: 5 | X: 1 → X = 1**

EXAMPLE 3 & DESK CHALLENGES

5-Anchor Subitizing: 8 = 5 + 3 & 10-Complement + 3 Challenges

3 5-ANCHOR SUBITIZING: SEE 8 AS 5 + 3 & 2 SHY OF 10

THE GOAL: Subitize 8 in 0.1 seconds and spot its 10-complement instantly!

1. FILL TOP ROW (5 COUNTERS):

Place 5 red counters across the top row to anchor the benchmark 5.

2. ADD 3 ON BOTTOM ROW:

Place 3 red counters on the bottom row: 5 on top + 3 below = 8 counters total.

3. SPOT 2 EMPTY HOLES:

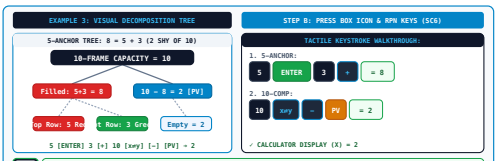

Notice 2 empty spots remaining in the frame: 8 is exactly 2 shy of 10!

✓ WHY 5-ANCHORS SUPERCHARGE MENTAL ARITHMETIC

The human eye can only subitize up to 4 items at once without counting 1-by-1.
Grouping in 5s lets you recognize 8 as (5 + 3) instantly—no counting needed!
Because a full frame is 10, the two empty holes immediately show that 10 − 8 = 2.
Verify on calculator: 5 [ENTER] 3 [+] (→ 8) | 10 [x≥y] [−] [PV] (→ 2) confirms both!

PRO TIP: CLOSE YOUR EYES & FEEL THE ANSWER

Once you build an example, run your fingers across the pieces. Your hands remember physical shapes and heights way longer than memorized rules!

3 DESK CHALLENGES — TRY THESE NOW!

WARM-UP #1 **Place 6 red counters on the frame. How many empty spots to make 10?**

Step A: Build with blocks on your Lid Tray • Step B: Verify on SC-32 Calculator

✓ **Build first, then flip booklet upside-down to check Answer #1 below!**

LEVEL-UP #2 **Use two 10-frames to solve 9 + 6 by moving 1 counter across!**

Step A: Build with blocks on your Lid Tray • Step B: Verify on SC-32 Calculator

✓ **Build first, then flip booklet upside-down to check Answer #2 below!**

BRAIN-MELTER #3 **Build 37 using purple '10' rods and unit counters. How many pieces total?**

Step A: Build with blocks on your Lid Tray • Step B: Verify on SC-32 Calculator

✓ **Build first, then flip booklet upside-down to check Answer #3 below!**

SELF-CHECK ANSWER KEY (ROTATE BOOKLET 180° TO READ)

#1: 4 spots (6 + 4 = 10) | #2: (9 + 1) + (6 + 5 = 10 + 5 = 15

#3: three '10' rods + 7 counters

FOR PARENTS & TEACHERS (Grades K–3 (Counting, Subitizing, Place Value & Regrouping))

- CCSS.MATH.CONTENT.K.OA.A.4: For any number from 1 to 9, find the number that makes 10.
- CCSS.MATH.CONTENT.1.OA.C.6: Add and subtract within 20 using the making-ten strategy.
- CCSS.MATH.CONTENT.1.NBT.B.2: Understand that the two digits of a two-digit number represent tens and ones.
- **CCSS.MATH.PRACTICE.MP2, MP4, MP5, MP7: Reason, Model, Use Tools & Structure.**

Next up on Page 06 → How to stack everything back in the box in 10 seconds!

BOSS CHALLENGE #4 **BLOCKS → BOX ICON KEY SPEED-RUN!**

1. Build Examples #1, #2, and #3 hands-on with your physical pieces.
2. Press the Box Button Icon ([▣] Ten-Frame & [PV]) and keystrokes on your calculator:

• **5 [ENTER] 3 [+] 10 [x≥y] [−] [PV] → X = 2**

CHECK OFF YOUR MASTERY MILESTONES:

- ☐ 1. Demonstrated Lessons #1, #2 & #3 hands-on with the physical blocks
- ☐ 2. Solved all 3 Desk Challenges above (check upside-down key if stuck!)
- ☐ 3. Demonstrated each lesson on the calculator using the Box Button Icon
- ☐ 4. **Packed all pieces back into the box in under 10 seconds (see Page 06 →)**

TEST YOURSELF • ANSWERS INCLUDED SO YOU CAN CHECK RIGHT AWAY

NEXT: PACK-UP MAP → PAGE 06

HOW TO STACK IT ALL BACK IN

The 10-Second Self-Checking Pack-Up Puzzle

TOP-DOWN BOX MAP: WHERE EVERY PIECE LIVES

Putting the blocks away is a 10-second puzzle. Match each piece to its labeled home bay below so everything nests flush and the lid snaps shut:

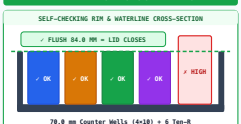

✓ FOUR 10-COUNTER TOWERS (70.0 MM LEVEL CHECK)

The box has 4 round wells that hold exactly 10 stacked counters each (4 × 10 = 40 counters), plus a side bay for the 6 purple '10' rods and 6 gold operator blocks (+, −, =).
When all 40 counters are stacked in the 4 wells, all four towers stand at the exact same 70.0 mm height—so you can spot a missing counter from across the room!

1. STORAGE CASE & COMPARTMENTS

2. WHY THE LID SELF-CHECKS EVERY PIECE

▲ SELF-INDEXING BAYS & EMBOSSED BOX BUTTON ICON:
Calibrated bays guide every piece home, and the lid icon links directly to your calculator.

THE 10-SECOND PACK-UP ROUTINE

HOW TO STACK EVERYTHING BACK IN:

1. SORT BY COLOR & NUMBER:
Group matching blocks or tiles together on your desk first.

2. STACK & DROP INTO LABELED BAYS:
Follow the Top-Down Box Map on the left. If a tower looks too tall or too short, a block is in the wrong bay—swap it until everything levels!

3. TUCK THIS CARD IN THE LID & SNAP SHUT:
Fold this guide back to [01] and rest it right on top before closing.

DUAL 10-FRAME STAGE LID

- The box lid has two built-in 2×5 ten-frames (20 spots total) for hands-on addition.
- Each counter is red on one side and green on the other—just flip to change signs or addends!
- Easy care: rinse in lukewarm soapy water and air dry.

SHORT A PIECE AT CLEAN-UP TIME?

First check under notebooks and chair legs! If a piece truly vanished, **see PAGE 08 (bottom-right) for your complete Part ID Reference Table.**

✓ BASE-10 4-POINT CLEAN-UP CHECKLIST

1. FOUR 70MM WELLS:	Stack 10 counters in each of the 4 round wells (all level at 70.0 mm).
2. SEAT 6 TEN-RODS:	Place all 6 Purple '10' rods and 6 Gold sign blocks into the side bay.
3. CLEAR 10-FRAME LID:	Remove any counters still seated in the 20 top lid sockets.
4. FOLD CARD & SNAP:	Lay this folded guide inside and snap the 10-Frame Lid shut!

MODULAR CLASSROOM & BOOKSHELF NESTING (42.0 MM PITCH)

Every StackCalc box is sized in exact multiples of 42.0 mm (1×1, 3×1, 3×2). All 9 kit boxes interlock side-by-side in a classroom cart or drawer with zero wasted space, and every embossed box icon matches its calculator operation key!

FOUR 10-COUNTER WELLS • EQUAL 70MM STACKS PROVE NOTHING IS LOST

WHY THIS MATTERS: ZERO "THROW-AWAY" MATH

In most classrooms, every grade uses a totally unrelated plastic toy.
In StackCalc, the 7mm unit block you count with in 1st grade is the exact same height as the 1/12th fraction block and the [2] prime block later on!

1. BASE-10 BOX LID ICON

[▦] Ten-Frame & [PV]

▲ **BOX ICON ↔ CALCULATOR KEY CONTINUITY:**
Every physical box lid carries the exact icon of the calculator key that computes that lesson!

HOW BLOCKS CONNECT TO THE CALCULATOR

SHARED MODULAR FOOTPRINT & HEIGHTS

- 10 stacked counters (70.0mm) match the height of ten [2] Prime Blocks or ten 1/12th Fraction Blocks.
- Recessed sockets swallow the bottom peg so only true heights add.
- All storage boxes nest neatly side-by-side on any desk or shelf.

WHY WE CALL IT "STACKCALC" (THE RPN SECRET)

- Bundling 10 ones into 1 ten-rod builds the intuition behind every base-10 calculator register.
- Placing a block on the table = pressing [ENTER] to push onto the stack.
- Snapping two towers together = pressing [+] or [×] with zero parentheses!
- Mirrors the 4 stack levels on the SC-32 calculator: X, Y, Z, and T.
