Build it with blocks. Solve it on paper. Prove it on the stack.

Every mathematical idea in this early elementary workbook begins in your hands. Before you write an equation or press a key on the StackCalc SC-6, you will arrange Place Value 6×2 Trays, Digit Blocks (0–9), and Gold [+1] Carry Tokens on your desk to see why numbers group and trade.

100% self-contained for homeschooling families and classrooms alongside any K–2 math curriculum, Early Elementary Math Lab guides learners through 10 deep units covering counting, addition/subtraction, make-10 regrouping, 2-digit arithmetic, and early multiplication: each with Core & Extension Concept Labs, 4-Problem Investigations, 6 leveled worksheets (Practice A–F), a 100-Point Unit Mastery Check, a STEM Lab Case Study, 4 Cumulative Mastery Exams, and 3D Block Studio Guides.

Inside the Grades K–2 Lab Workbook: 4-Page Bootcamp • 10 Eleven-Page Units (110 Lab, Practice A–F, Quiz & STEM Pages) • 840 Active Problems • 4 Cumulative Mastery Exams & 3D Block Studios (PLACE-01) • 128 Pages.
