STUDENT LAB WORKBOOK • UNITS 1–12

HANDS-ON MATH LAB

Student Explorations from Physical Blocks to the Stack

StackCalc

MATHEMATICS / STUDENT LAB WORKBOOK

Build it with blocks. Predict the pattern. Prove it on the stack.

Every mathematical idea in this workbook begins in your hands. Before you write an equation or press a calculator key, you will arrange ten-frames, dominoes, 84 mm fraction towers, algebra tiles, or probability dice on your desk to see why the pattern works.

Designed as the student lab companion to From Blocks to the Stack (SC-6) and Thinking in the Stack (SC-32), Hands-On Math Lab guides learners through 12 progressive concept investigations with visual block sketches, guided stack walkthroughs, structured lab recording sheets, and a self-check answer key.

Inside the Student Lab Workbook: 12 Hands-On Lab Units • Story openers & visual block rules • Guided SC-6 & SC-32 stack traces • 72 structured lab investigations & student answer key.
