STUDENT FLUENCY & COMPETITION WORKBOOK • TRIALS 1–12 & C1–C3

STACK SPEED & FLUENCY

15 Timed Number Sense & RPN Proficiency Sprints

StackCalc

MATHEMATICS / NUMBER SENSE & COMPETITIONS

How fast can you think when parentheses get out of the way?

In Reverse Polish Notation (RPN), you evaluate expressions from the inside out—the exact order in which you simplify mathematics in your head. Without parenthesis keys or hidden pending operations, every intermediate result sits visibly on the four-level stack.

Stack Speed & Fluency challenges students from elementary number sense through high school UIL/TMSCA calculator competitions with 15 timed proficiency sprints, inside-out expression tactics, personal progress logs, and a complete self-check answer key.

Inside the Workbook: 12 Unit Time Trials • 3 Cumulative Championship Rounds (C1–C3) • 150 timed sprint problems • Inside-out RPN speed tactics & self-check answer key.
