Numbers to 20: Place Value & Staging

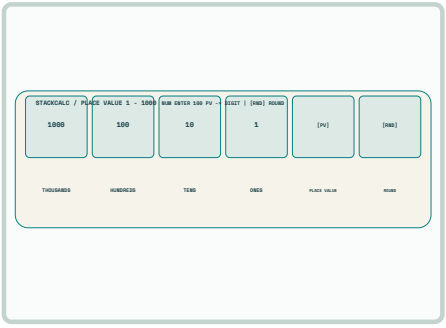
Tactile Concrete-Pictorial-Abstract (CPA) Station Guide • CCSS.MATH.1.NBT.B.2

Student Name: _____ Date: _____ **Model: SC-6** **Check Score: ___ / 4**

STUDENT SELF-CHECK RULE (NO CHEATING):
Build with blocks and solve on paper first! Use your SC-6 calculator ONLY to verify answers on the 4-line LCD screen.

STATION LAB TUTORIAL: BENCH SCHEMATIC & CPA PROGRESSION

1. 2D Bench Blueprint



Kit: Place Value Tray Whole

2. Desk Setup (Concrete -> Pictorial)

Physical Bench Setup:
One 10-rod alongside 4 unit cubes shows 14 as 1 ten and 4 ones.

Sketch Model on Paper:
Draw a 10-rod bar and 4 individual unit squares.

3. Verify with SC-6 (Abstract)

RPN Stack Register Flow:
Press [123] mode on SC-6: stack visually displays tens and ones columns.

Self-Check Keystroke Sequence:

`1` `0` `enter` `6` `+`

Expected LCD: 16 (1 ten, 6 ones)

TEACHER DIAGNOSTIC GUIDE: COMMON MISCONCEPTIONS & REMEDIATION

Key Misconception to Target During Station Observation:

Watch for reversing digits (writing 41 instead of 14).

How the Manipulatives & Calculator Foster Self-Correction:

Students solve with pencil and physical blocks first. When they self-check on the SC-6, any discrepancy between their written answer and the calculator's 4-line LCD immediately prompts them to re-inspect their physical bench model or regrouping, turning errors into productive struggle without teacher intervention.

Station Facilitation & Pacing Tip:

Keep 3D printed trays docked on standard Gridfinity baseplates to prevent loose parts on student desks. Encourage students to articulate their CPA steps: name the block representation (Concrete), point to their drawn tape/bond model (Pictorial), and verify register values (Abstract).

CLASSROOM SCORING & STATION MASTERY RUBRIC

Exemplary (18–20 pts):	Complete, accurate manipulative sketches; exact math answers; independently verified self-check on LCD stack.
Proficient (14–17 pts):	Correct math answers; minor sketch omissions; verified on calculator with minimal teacher prompting.
Developing (10–13 pts):	Understands problem concept but made computational slips; successfully self-corrected using calculator LCD.
Intervention (<10 pts):	Relied on calculator before solving on paper, or struggled with underlying physical manipulative models.
