Making 10 to Add (Bridging Through 10)

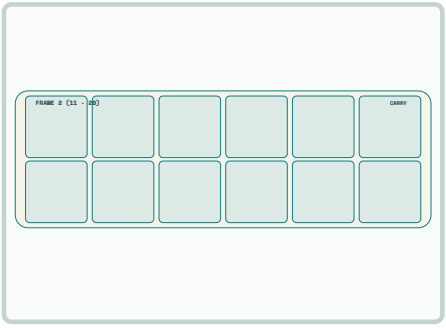
Tactile Concrete-Pictorial-Abstract (CPA) Station Guide • CCSS.MATH.1.OA.C.6

Student Name: _____ Date: _____ **Model: SC-6** **Check Score: ___ / 4**

STUDENT SELF-CHECK RULE (NO CHEATING):
Build with blocks and solve on paper first! Use your SC-6 calculator ONLY to verify answers on the 4-line LCD screen.

STATION LAB TUTORIAL: BENCH SCHEMATIC & CPA PROGRESSION

1. 2D Bench Blueprint



Kit: Ten Frame Shelf

2. Desk Setup (Concrete -> Pictorial)

Physical Bench Setup:
Frame A has 8 counters; Frame B has 5. Move 2 from B to A to make a full 10.

Sketch Model on Paper:
Draw 8 dots in Frame 1, 5 dots in Frame 2, arrow moving 2 dots.

3. Verify with SC-6 (Abstract)

RPN Stack Register Flow:
Decompose 5 into 2 and 3: [8] [ENTER] [2] [+] gives 10; [3] [+] gives 13.

Self-Check Keystroke Sequence:

`9` `enter` `1` `+` `5` `+`

Expected LCD: 15 (10 + 5)

1 **Bridge through 10 to solve 8 + 5: 8 + 2 + 3.**

Manipulative Model & Desk Sketch (Show your work):

Final Math Answer: _____

☐ Verified on SC-6

2 **Bridge through 10 to solve 7 + 6: 7 + 3 + 3.**

Manipulative Model & Desk Sketch (Show your work):

Final Math Answer: _____

☐ Verified on SC-6

3 **Bridge through 10 to solve 9 + 7: 9 + 1 + 6.**

Manipulative Model & Desk Sketch (Show your work):

TEACHER DIAGNOSTIC GUIDE: COMMON MISCONCEPTIONS & REMEDIATION

Key Misconception to Target During Station Observation:

Emphasize finding the complement of the first number to 10 first.

How the Manipulatives & Calculator Foster Self-Correction:

Students solve with pencil and physical blocks first. When they self-check on the SC-6, any discrepancy between their written answer and the calculator's 4-line LCD immediately prompts them to re-inspect their physical bench model or regrouping, turning errors into productive struggle without teacher intervention.

Station Facilitation & Pacing Tip:

Keep 3D printed trays docked on standard Gridfinity baseplates to prevent loose parts on student desks. Encourage students to articulate their CPA steps: name the block representation (Concrete), point to their drawn tape/bond model (Pictorial), and verify register values (Abstract).

CLASSROOM SCORING & STATION MASTERY RUBRIC

Exemplary (18–20 pts):	Complete, accurate manipulative sketches; exact math answers; independently verified self-check on LCD stack.
Proficient (14–17 pts):	Correct math answers; minor sketch omissions; verified on calculator with minimal teacher prompting.
Developing (10–13 pts):	Understands problem concept but made computational slips; successfully self-corrected using calculator LCD.
Intervention (<10 pts):	Relied on calculator before solving on paper, or struggled with underlying physical manipulative models.
